HOMEGENNY · GUIDE FOR STAFF

Working with HomeGenny: from sign-up to salary

For cooks, caretakers and nurses. How to join, get trained, check in at work every day, and see your salary, step by step in the app.

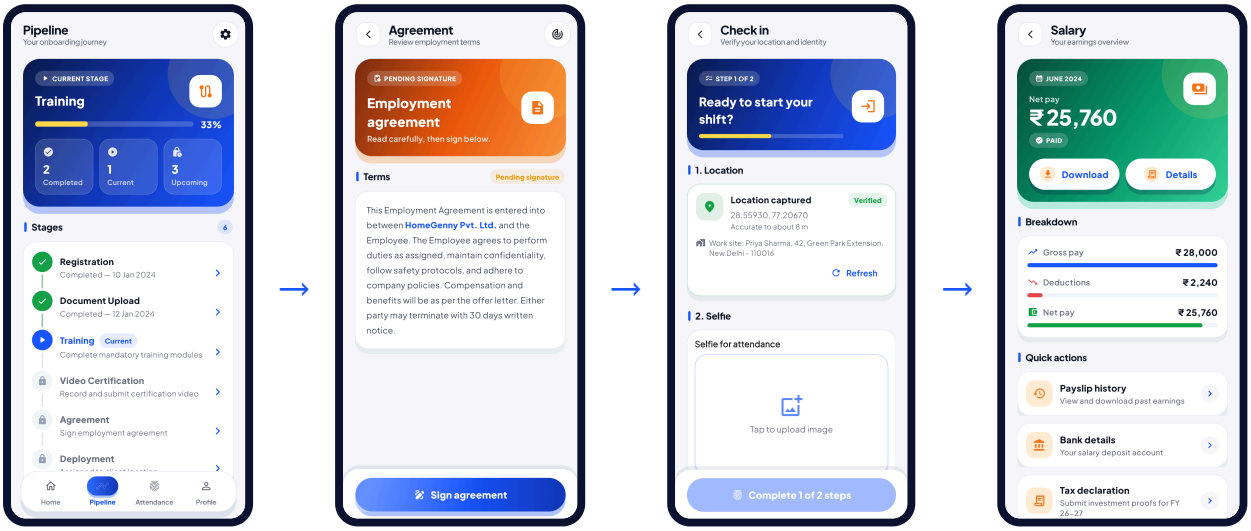

The pictures in this guide come from the HomeGenny app with sample names and numbers. Your screens will show your own details. The app works in English and Hindi.

How HomeGenny works for you

HomeGenny gives you **steady, long-term work** with checked families. Before your first job, you go through a few steps: your documents are checked, you get **free training**, and you sign your agreement.

Your **Relationship Manager (RM)** is your HomeGenny contact. Your RM moves you through each step, finds you a family, sets up a short trial, and makes sure you are paid on time. You never have to agree on work or money with the family yourself.

Enter your number

Type the code

Let's get you started with two choices.

Common questions

Do I need a password?

No. You log in with your mobile number and a code sent by SMS. You can turn on fingerprint login in Settings.

Is there a deposit?

Yes. When you join, you pay your RM a small refundable deposit: ₹1,000 for caretakers and cooks, and ₹1,500 for nurses (skilled caretakers). Your RM explains when you get it back.

How long does joining take?

It depends on your documents, checks, training and videos. Your RM moves you to the next step as soon as each one is done. Watch the **Pipeline** tab.

Check-in says my location could not be confirmed.

Turn on location (GPS) on your phone, go close to the home's entrance and tap **Refresh**. Check-in only works for a job your RM has confirmed.

The family asked for something that is not my work.

Tap **Not my job** on the instruction. Your RM reviews it. You will not be punished for refusing work that is not part of your agreement.

The app says "Session expired" or "No internet".

"Session expired" means you need to log in again with your number and a new code. "No internet" means your phone is offline: check Wi-Fi or mobile data.

Who do I call for help?

Your RM. You can also open Settings → **Help & support** to chat, call or email HomeGenny.
